

FOR IMMEDIATE RELEASE

JFI Jets Inaugurates Private Jet Charter Service to Cuba

Farmingdale, NY... August 27, 2015 -- [JFI Jets](#), a global leader in private jet charter, aircraft management and maintenance, has begun providing on-demand charter service to Cuba from its aircraft bases in Southern, and Northern California, the New York metropolitan area Wilmington, Delaware and throughout the United States.

“Few private charter carriers have the necessary certifications to fly to Cuba presently and even fewer have the local knowledge and contacts on the ground that are key to executing a flawless trip,” says David J. Rimmer, president of JFI Jets, adding, “at JFI we have both. We can provide a level of convenience, customer service and expertise that is unparalleled in the private jet charter industry.”

While JFI Jets has all of the necessary clearances to land in Cuba, at the present time U.S. citizens are required to comply with U.S. Government restrictions for Cuban travel, which are outlined on the [U.S. Treasury Fact Sheet](#). Flights to Cuba must also originate from U.S. Government-designated gateway cities.

Rimmer encouraged booking as early as possible to ensure availability, saying, “Our first flight on the heels of Secretary of State Kerry raising the flag at the U.S. Embassy in Havana recently was perfect.”

The company reports that is currently accepting requests for Cuba flights during the peak charter periods through the Fall and Winter.

About JFI Jets

JFI Jets is a full-service air carrier that brings together extensive aviation expertise, first-class service and impeccable hospitality. For more than 20 years, JFI Jets has provided an unmatched level of service, safety and privacy for charters as well as aircraft management, maintenance and worldwide aviation consulting. The company’s commitment to safety has garnered prestigious, third party ratings including the ARGUS Platinum Rating, Wyvern Wingman and ISBAO certification.
